23. Problem: (use additional Sheets if necessary)
The thresholds on the logsegment of database DataPool on l0acg02_srvr have been crossed over frequently when EcDlCleanupDatapool runs. This caused many extra transaction dumps for this database.

24. Proposed Solution: (use additional sheets if necessary)
DDM of Landover suggested that 500M needs to be added to the logsegment of DataPool to support routine DataPool activities.
This has been done at Larc.

25. Alternate Solution: (use additional sheets if necessary)
Modify EcDlCleanupDataPool script to clean up a smaller batch each time. Or live with extra transaction dumps frequently.

26. Consequences if Change(s) are not approved: (use additional sheets if necessary)
The logsegment of DataPool will get filled up frequently and it will impact the performance of the DataPool system.
